

Group Environmental Policy

Group Environmental Policy

Sembcorp Industries Ltd (“Sembcorp”) is committed to conducting our business in an environmentally responsible and sustainable manner. This commitment is part of our ambition to enable a low-carbon and circular economy. To achieve this, we aim to:

Climate Change:

- Establish a balanced portfolio of low-carbon energy assets
- Achieve a greenhouse gas emissions intensity of < 0.40 tCO₂e/MWh by 2030 in line with a 2°C scenario
- Restrict investments in coal-fired power plants
- Grow our green business lines with a focus on energy efficiency, digitalisation and new energy solutions

Resource Management:

- Adopt the principles of reduce, reuse and recycle in supporting a circular economy approach in our operations
- Improve energy efficiency and minimise water use through process design, engineering, operational optimisation and deployment of innovative technologies

Local Environmental Protection:

- Assess and mitigate the environmental impacts of our projects
- Comply with all applicable environmental laws and regulations
- Identify, manage and minimise any impacts that affect air and water quality, such as effluents, air emissions, and hazardous waste
- Avoid the implementation of projects in legally protected or internationally recognised areas of critical habitat

Our Commitment:

- We seek to adopt international best practice standards for environmental management and are committed to achieving ISO 14001 certification for our environmental management systems across our key operations
- We take a precautionary approach to environmental risks and seek to reduce or avoid potential negative impacts
- We provide relevant training and tools to ensure a competent workforce to better manage environmental risks
- We assess our environmental performance, set targets to drive continuous improvement and report our environmental performance to stakeholders
- We expect all our contractors and suppliers to minimise their impact on the environment in all their operations, products and services
