

## Financial Highlights

### Strong Performance and Strategic Momentum

Our focus on execution is delivering results and we are pushing confidently towards our target of 10GW of gross installed renewables capacity by 2025.

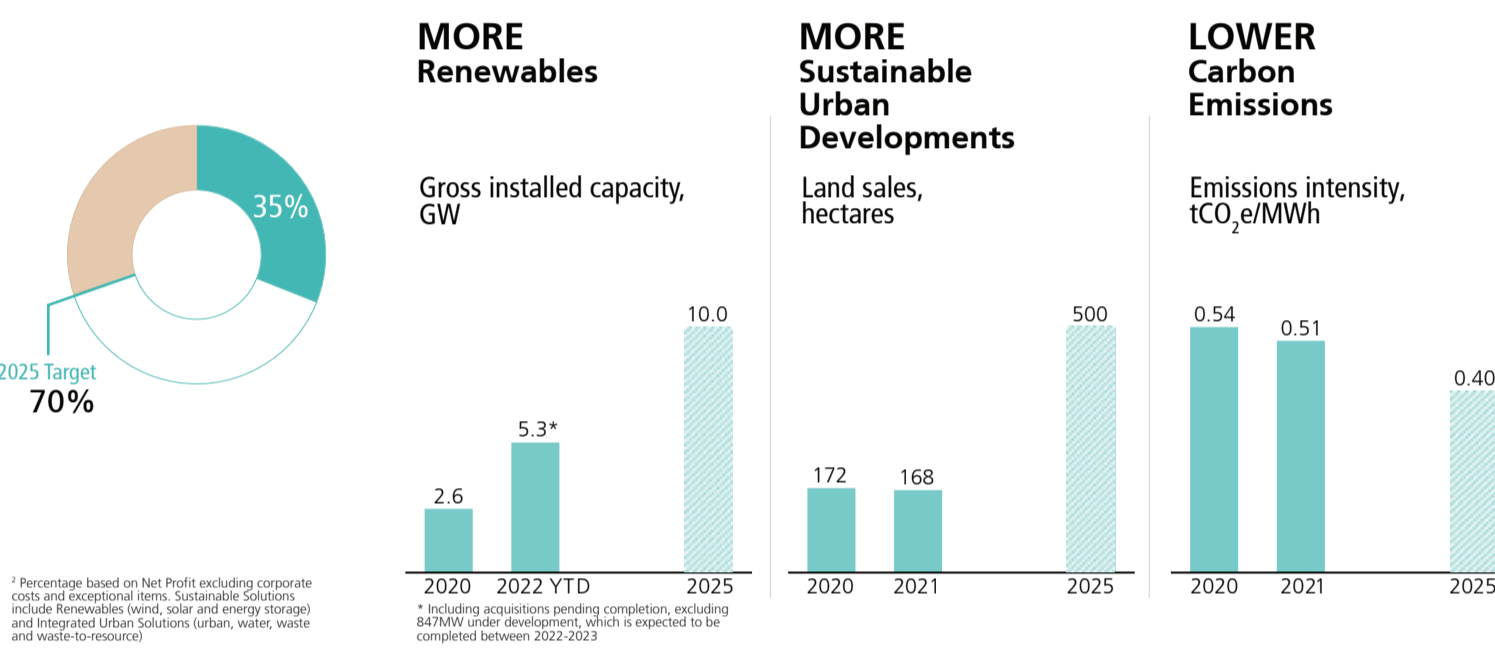

**Wong Kim Yin**  
Group President & CEO

## Strategy Highlights

### Transforming Our Portfolio from **Brown** to **Green**

#### Our Progress

**More Sustainable**  
% Share of Net Profit from Sustainable Solutions<sup>2</sup>

<sup>1</sup> Percentage based on Net Profit excluding corporate costs and exceptional items. Sustainable Solutions include Renewables (wind, solar and energy storage) and Integrated Urban Solutions (urban, water, waste and waste-to-resource).

<sup>2</sup> Including acquisitions pending completion, excluding 847MW under development, which is expected to be completed between 2022-2023.

#### Executing our financing strategy

Successfully raised S\$1.1 billion of green and sustainable financing within the year

**S\$400M Green Bond Offering**

First certified green bond under the Climate Bond Standards by a Singapore-based energy company

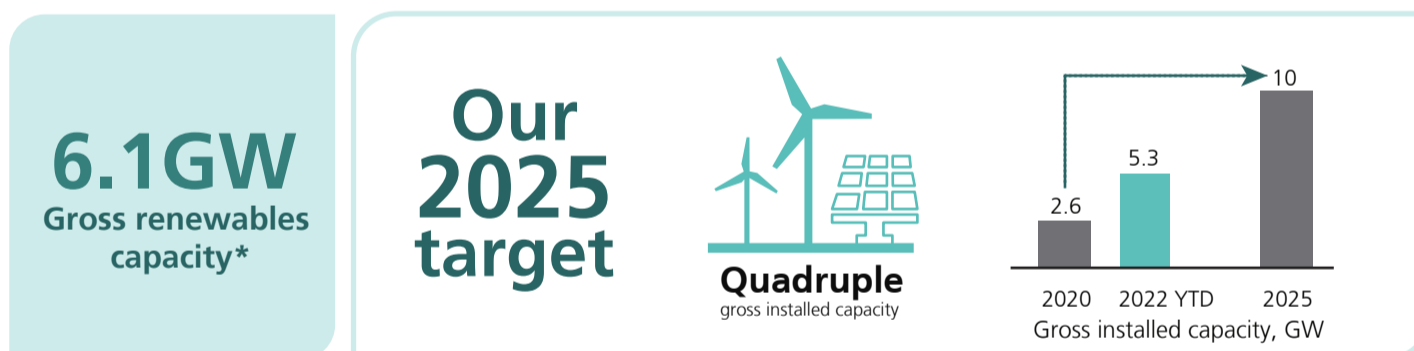

**S\$675M Sustainability-Linked Bond**

First issuance by an energy company in SEA and the region's largest such issuance to date. Anchored by an investment of S\$150 million from International Finance Corporation

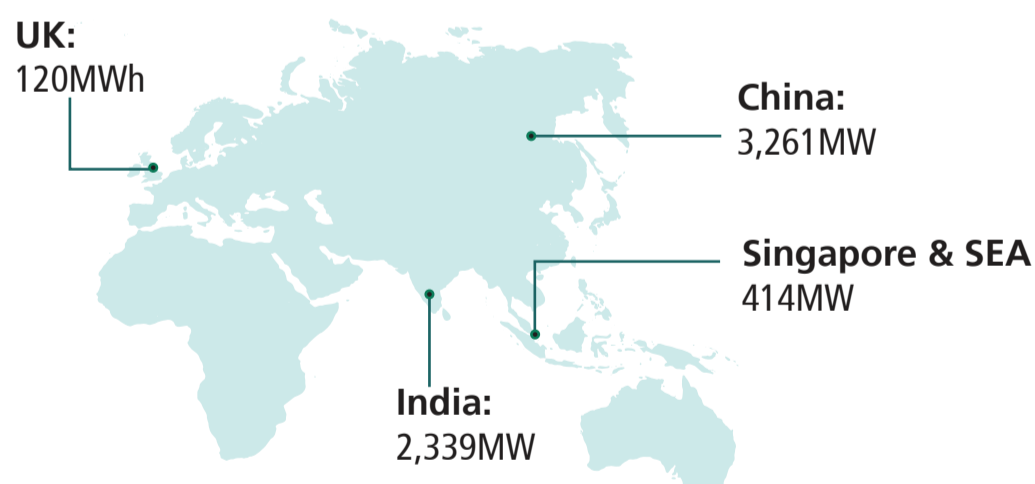

## More Renewables

#### Our Progress

On track to achieve 2025 target of 10GW gross installed renewables capacity

#### Gross renewables capacity by market\*

\*Gross renewables capacity installed and under development, including acquisitions pending completion

#### Renewable milestones in key markets

**Singapore & SEA**  
Leading industry and pushing frontiers

- Completed Sembcorp Tengeh Floating Solar Farm
- Secured 166MW of solar projects in Singapore and Vietnam in 2021

**India**  
Endorsement of Sembcorp's competitiveness

- Secured 210MW of new contracts, including 180MW wind power project from SECI 11 wind auction

**China**  
Well-positioned for significant growth

- Announced acquisition of 98% stake in 658MW of operational wind and solar assets
- Completed acquisition of 35% stake in SDIC New Energy with total gross installed capacity of 1.9GW in January 2022

**UK**  
Building track record for a net-zero economy

- Commenced operations for 10MWh of battery storage, bringing total operational capacity to 70MWh

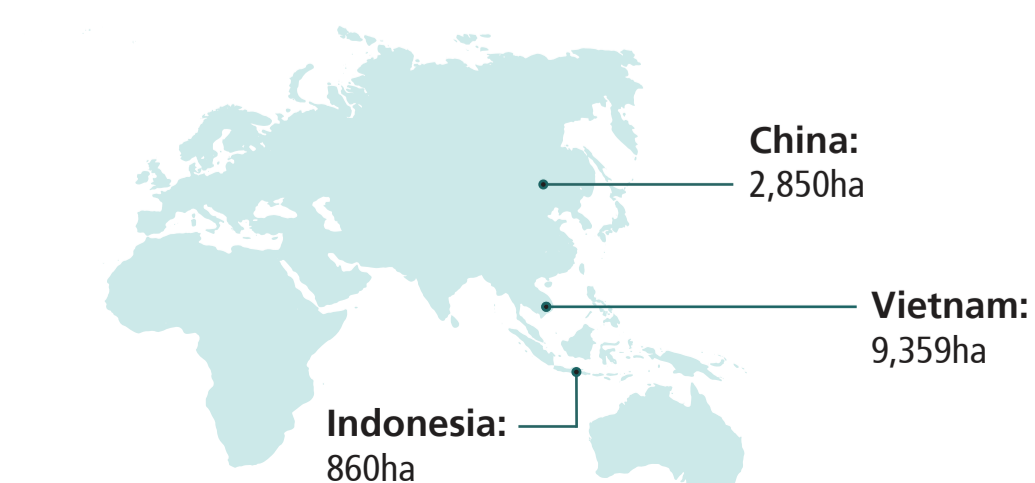

## More Sustainable Urban Developments

#### Our Progress

Resilient land sales despite COVID-19 related shut downs

#### Integrated urban development projects

#### Integrated Urban Solutions

**Urban**  
Capturing value and building land bank

- Sold record nine plots of Industrial & Business and Commercial & Residential land types at Sino-Singapore Nanjing Eco Hi-tech island in China
- Secured investment licence to develop a 481ha new industrial park in Vietnam's Quang Tri Province, joint venture company established in February 2022
- Land bank increased from 12,588ha to 13,069ha with addition of Quang Tri project

#### Sustainable solutions

**Pursuing green technologies for decarbonisation**

- MOU to explore supply chain commercialisation of decarbonised hydrogen into Singapore
- Exploring development of UK's first Net-Zero emissions 300MW power plant at Wilton International
