FUEL MIX DISCLOSURE NOTICE

April 2025 to March 2026

The Electricity (Fuel Mix Disclosure) Regulations 2005 introduced an annual requirement for electricity suppliers to notify customers of the fuel sources used to generate the electricity supplied to them and its associated environmental impact. This requirement is reflected in Standard Licence Condition 21 of the electricity supply licence.

The average fuel mix of the total amount of electricity purchased for supply by UK Power Reserve Limited during the period 1 April 2025 to 31 March 2026 was as follows:

Fuel source	Electricity supplied by UKPR (%)	GB average for comparison (%)
Coal	11.4	4.7
Natural gas	65.3	31.4
Nuclear	7.1	13.7
Renewable	10.8	48.0
Other	5.4	2.2

Environmental impact per kWh

Measure	Electricity supplied by UKPR	GB average for comparison
Emissions of carbon dioxide	290 g/kWh	179.22 g/kWh
Production of high-level radioactive waste	0.000426 g/kWh	0.000822 g/kWh

This notice is provided for information purposes only. No further action is required.
